

# RECOMMENDATIONS FOR SOFT WATER (<300 PPM HARDNESS)

## General Information

### GENERAL INFORMATION

LANDMARK is a unique blend of high foaming surfactants and stabilizers that delivers longer lasting dense foam under windy, hot conditions and in all ranges of water hardness. LANDMARK is easy to mix and is compatible with foam dyes, antifreeze and cold water.

Note: LANDMARK mixes easily but best results can be obtained by adding the concentrate halfway into the filling of the foam tank with water.

### Limitations, Restrictions, and Exceptions

(<300 ppm hardness) 120:1 to 160:1 ratio
