

CURRENTS, BLUEBERRIES, CANEBERRIES ETC.

General Information

GENERAL INFORMATION

This product is a bacterium which is selectively toxic to many moth and butterfly larvae (Caterpillars). The insects stop feeding and die within 2 - 3 days of ingestion. This product may be applied up to the day of harvest.

Apply at first sign of infestation, and repeat at weekly intervals as needed to maintain control. This product may be applied by hose-end sprayers, pressurized hand sprayers, or mist blowers. Apply thoroughly to upper and lower leaf surfaces, but not to the point of excessive run-off. Reapply after heavy rains. Agitate regularly while spraying.

Do not apply through any type of irrigation system.
