

FOR ORNAMENTAL PLANTS, (INCLUDING INDOOR HOUSEPLANTS), SHRUBS AND ROSES

General Information

Bonide Mite-X Ready to Use is a pesticide for use in controlling Mites, Thrips and Aphids. Pests must come in contact with Mite-X in order to be affected. This product is exempt from registration with the Federal EPA under section 25(b) of FIFRA, and as such, is not registered with the Environmental Protection Agency. Bonide represents that the ingredients qualify for exemption from registration under FIFRA.

HELPFUL TIPS WHEN USING THIS PRODUCT:

- Begin using this product as soon as insects are present.
- Apply early in the morning or late afternoon when temperatures are lower.
- Spray directly onto insects.
- Thorough spray coverage provides best insect control.
- For severe insect infestation, rotate between an alternative product and Mite-X every other application.
- Do not apply to stressed, wilted or newly transplanted plants.
- Mite-X has not been used on all plants under all conditions. Some injury may occur to some plants at sensitive stages of growth. Open blooms of some plants can also be damaged. Before applying to a large number of plants, test Mite-X first, on one or two plants for potential damage.

Limitations, Restrictions, and Exceptions

FOR ORNAMENTAL PLANTS, (INCLUDING INDOOR HOUSEPLANTS), SHRUBS AND ROSES:

Begin applying Mite-X as soon as insects appear, spraying directly on insects wherever possible. As a spot treatment, apply to cover both the upper and lower leaf surfaces to the point of runoff (product begins to drip off of leaf surfaces). Repeat treatment as needed to maintain insect control.

Method
