

AZALEAS. CAMELLIAS, RHODODENDRONS, AND OTHER SHRUBS

General Information

Controls listed insects and diseases on roses, flowers and other ornamentals

One quart treats up to 16 Roses

Controls Japanese beetles, borers, aphids, black spot, powdery mildew and other listed insects & diseases.

Read and follow these directions when using:

- Do not apply near lakes, streams, rivers or ponds.
- Do not apply to plants grown for food.
- Do not treat plants grown in pots, flower boxes or other containers.
- Do not apply to soils which are water-logged or frozen.
- Measuring utensils such as measuring cups and measuring spoons must not be used for any food or drinking water purposes after use with this product.

HOW TO USE

Shake Well Before Use:

- Fill a bucket or watering can with the appropriate amounts of concentrate (add first) and water (add last).
- Single Plants

Slowly pour as close to the base of the plant as possible, being careful not to get on leaves.

- Flowerbeds:

Sprinkle over the tops of the plants and cover the entire area.

NOTE: The Flowerbed solution is diluted with more water than the Single Plant solution to ensure safety to plant leaves when sprinkling over the top.

- When finished, rinse the bucket/watering can with clean water and pour onto treated area.

FOR BEST RESULTS

- Begin using this product in the spring when plants are actively growing.
- Reapply every 6 weeks for a total of 3 applications per year. In areas where disease occurs frequently and the soil is sandy, the application interval can be

shortened to 4 - 5 weeks for a total of 4 applications per year.

- Ensure the product gets down into the rootzone by:
- pulling mulch away from plants to be treated.
- building a well around individual plants.
- pouring the drench solution slowly to allow the soil to absorb it.
- Keep rose, flower, and shrub beds clean.

This minimizes harborage sites for diseases and insects (for additional cultural practices, consult your County Extension Service).

HOW THIS PRODUCT WORKS

Water moves the product down into the root zone where it is taken up and moved into the plant. The entire plant, even new growth, is protected against insects and disease. Rain or watering cannot wash off this long-lasting systemic protection.

Do Not Allow Children and Pets to Enter the Treated Area Until It Has Dried

WHERE TO USE

Roses, flowers, iris, hibiscus, azaleas, camellias, rhododendrons and other shrubs

WHEN TO USE

COVERAGE

Treats up to 16 roses & other shrubs or 200 square feet of flowerbed (32 fl.oz.)
