

USE RATE: 0.5-2 OZ PER 100 GALLONS OF SOLUTION

General Information

GENERAL INFORMATION

EXTINCT XL is a proprietary silicone antifoam emulsion designed for prevention or suppression of foam formation in aqueous solutions. The functional properties include quick dispersibility, slight insolubility, relative stability, and spreadability in ionic solutions.

EXTINCT XL is very aggressive in agricultural pesticide tank mixes, especially ROUNDUP ULTRA, offering antifoaming qualities when used in a premix or defoaming characteristics on already existing foam. All emulsifiers used in this formulation are non-ionic, offering superior uniformity and compatibility.

This product cannot be used for aquatic applications.

NOTE: KEEP OUT OF LAKES, PONDS OR STREAMS. DO NOT CONTAMINATE WATER BY CLEANING OF EQUIPMENT OR DISPOSAL OF WASTES.

Limitations, Restrictions, and Exceptions

USE RATES:

- It may be necessary to adjust the amount used according to individual conditions.

NOTE: it is always best to add to tank mixture before foam has already formed.
