

AERIAL APPLICATION

General Information

GENERAL INFORMATION

POWER-LINE 10% Boron is a manufactured liquid nutrient. Its use is suggested as a supplement to a regular balanced fertilizer program to enhance yields and improve quality.

COMPATIBILITY

POWER-LINE 10% Boron is compatible with most fertilizers and pesticides. However, a compatibility test is suggested if the desired combination has never before been used.

Refer in the label for tank mix instructions.

Limitations, Restrictions, and Exceptions

AERIAL APPLICATION

Using a total of 7 to 10 gallons of water per acre is sufficient to apply the recommended amount of POWER-LINE 10% Boron. If less water is used a slight burning of the foliage may occur. Aerial application should not exceed 1 quart per gallon of water to insure good coverage.

SUGGESTIONS FOR USE

Optimum rate of application will vary between fields. For best results, follow soil test or plant analysis. POWER-LINE 10% Boron is intended for use in a balanced fertility program.

NOTES

This micronutrient contains Boron, which may be injurious to certain crops. For specific crop recommendations consult with a Power-Line Products representative. POWER-LINE 10% Boron is compatible with a Power-Line Product representative.

Do not use POWER-LINE 10% Boron with oils, lime sulfur and/or highly alkaline spray

materials.
