

## **GROUND APPLICATION**

### General Information

Chelated Micro Mix (N.S.) contains boron and is recommended for all crops where boron may be deficient. However, misapplication may result in serious injury to susceptible crops. Consult a crop advisor for specific crop recommendations.

### GENERAL INFORMATION

POWER-LINE Chelated Micro Mix (N.S.) is a manufactured liquid nutrient intended for soil application. Its use is suggested as a supplement to a regular balanced fertilizer program to enhance yields and improve quality.

### COMPATIBILITY

POWER-LINE Chelated Micro Mix (N.S.) is compatible with most neutral pH fertilizers and pesticides. However, a compatibility test is suggested if the desired combination has never before been used.

### MIXING DIRECTIONS

When tank mixing with pesticides or other products follow label directions and agitate while mixing.

### SUGGESTIONS FOR USE

Optimum rate of application will vary between fields. For best results, follow soil test or plant analysis.

POWER-LINE Chelated Micro Mix

(N.S.) is intended for use in a balanced fertility program.

NOTE: For specific crop recommendations consult with a LV representative, or Land View, Inc.

### Limitations, Restrictions, and Exceptions

#### DIRECTIONS FOR USE

GROUND APPLICATION: Apply up to 6 gallons/acre based on soil test recommendations with sufficient water to provide the desired coverage.

NOTE: One gallon of POWER-LINE Chelated Micro Mix (N.S.) contains (in units) .24 Zn, .16 Mn, .0583 Cu, .16 B.
