

HERBICIDES, DEFOLIANTS, DESICCANTS, FOLIAR NUTRIENTS

General Information

GENERAL INFORMATION

SURF-90 is a general purpose non-ionic surfactant of the alkylaryl polyethoxyethanol type surface active agents. It can be used with most insecticides, fungicides, herbicides, acaricides, defoliants, desiccants and wettable powders to improve performance of the active spray ingredient by giving them more uniform distribution and better wetting of the plant surface.

MIXING INSTRUCTIONS

For wettable powders and water-soluble materials, add this product in water before adding pesticide to spray tank. For emulsifiable products, add this product after a good emulsion is formed.

Limitations, Restrictions, and Exceptions

HERBICIDES, DEFOLIANTS, DESICCANTS, FOLIAR NUTRIENTS:

Use 1 to 4 pints of SURF-90 per 100 gallons of spray.

NOTE: The above recommendations are considered to be adequate for most uses. Some pesticides, however, may require higher rates for optimum effect. Follow the pesticide label directions when this occurs. However, do not add this product at a rate which exceeds 0.50% (one-half) of the finished spray volume.
