General Information

General Information

BRANDT MONOPLEX MANGANESE is a water degradable granular complex recommended for ground or aerial applications to prevent and correct manganese deficiency in crops.

Mixing And Handling Instructions

BRANDT MONOPLEX MANGANESE is recommended for use on all types of soils. To ensure uniform coverage, this product should be dissolved in water or fluid fertilizer, or dry blended with water soluble fertilizers. For trees or individual plants, the complex may be blended with an inert (such as soil or sand) or sprinkled directly on the soil uniformly under the plant's drip line, then watered in.

The rates given are based on broadcast application. If broadcast rates are used for spot or banded applications, phytotoxicity may result.
