

## **HARD-TO-WET PLANTS AND FOLIAGE**

### General Information

#### GENERAL INFORMATION:

MONTEREY NATURE'S OWN SPRAY HELPER is derived from natural cottonseed oil, and is a non-ionic surface acting wetting agent which will increase the efficiency of various weed killers, insecticides, and fungicides.

MONTEREY NATURE'S OWN SPRAY HELPER is compatible with most weed killers, insecticides, and fungicides. Follow pesticide manufacturer's label and directions for use.

#### DIRECTIONS FOR USE:

Normal use on easy-to-wet plants and foliage: 1/2 tsp. per gallon of mixed spray solution. Hard-to-wet plants and foliage: 1 tsp. per gallon of mixed spray solution.

1. Mix pesticide and water following manufacturer's label instructions.
2. Add Monterey - Nature's Own Spray Helper as recommended.
3. Mix thoroughly to insure uniform dispersion.
4. Spray in normal manner as recommended on pesticide manufacturer's label.
