

# **FARM BUILDINGS, VEHICLES, ETC.**

## General Information

### INDICATIONS

Profilm Disinfectant Concentrate solution has a built-in time release of formaldehyde for the final disinfection of farm and hatchery buildings, vehicles and equipment. Little or no formaldehyde odour will be detected.

Profilm has proven effective as a disinfectant by the A.O.A.C use dilution test modified for spray products against the following organisms. All dilutions (1:128) tested at 400 ppm water hardness (as calcium carbonate) and 5% bovine serum.

Profilm has proven virucidal efficacy for use on hard nonporous inanimate environmental surfaces. All dilutions (1:128) tested at 400 ppm water hardness (as calcium carbonate) and 5% bovine serum.

Profilm has proven effective fungicidal activity by the A.O.A.C. use dilution test modified for spray products. All dilutions (1:128) tested at 400 ppm water hardness (as calcium carbonate) and 5% bovine serum.

### DIRECTIONS FOR USE

Dilute with cold water as directed below and apply by spray or manual methods. Allow to air dry after assuring a minimum contact time of 10 minutes. A minimum contact time of 60 minutes is recommended for disinfection of Foot and Mouth Disease virus.

### Limitations, Restrictions, and Exceptions

Farm Buildings, Vehicles, etc.

Use Dilution: 1 :128

Evacuate animals from buildings or vehicles. Remove all litter and manure from floors, walls and surfaces of barns, pens, stalls, chutes and other facilities. Pre-clean all surfaces using a germicidal detergent (e.g., Proquat) and rinse with water. Thoroughly wet all surfaces with Profilm solution. Ventilate buildings and other closed spaces and allow treatment to dry before housing livestock. Rinse feeders

and waterers with potable water before reuse.
