

# **MICE**

## General Information

**DIRECTIONS:** Place RAMIK BARS in locations where rats and mice will most likely find and consume the bait. Place bait in concealed corners, along walls, where rats and mice feed.

**USE LIMITATIONS:** Bait **MUST** either be placed in tamper-resistant bait stations or in locations not accessible to children, pets or livestock. **DO NOT** place bait in areas where there is a possibility of contaminating food or surfaces that come in contact with food.

**FOLLOW-UP:** Replace contaminated or spoiled bait immediately. Using waterproof gloves collect and dispose of all dead, exposed animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

## Limitations, Restrictions, and Exceptions

**APPLICATION DIRECTIONS:** Each Ramik® Bar consists of either a 12 oz. block scored so that it can be broken into 12 one ounce pieces or a 16 oz. block scored so that it can be broken into 16 one ounce pieces.

**HOUSE MICE:** Break Ramik® Bar into discrete 1-ounce pieces. Apply one 1-ounce piece per placement. Space placements at 8- to 12-foot intervals. Placement of two 1-ounce pieces each may be needed at points of very high house mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until there no longer are signs of new feeding by house mice.

**FOLLOW-UP:** Replace contaminated or spoiled bait

immediately. Using waterproof gloves collect and dispose of all dead, exposed animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.
