

USE SITE: TURFGRASSES

Limitations, Restrictions, and Exceptions

- If adults or large nymphs are actively tunneling, MIDASH 2SC T&O application should be combined with a curative insecticide. Follow label instructions for other insecticides when tank mixing. Consult your local turf, state Agricultural Experiment Station, or State Extension Service Specialists for more specific information regarding timing of application.

Notes and Restrictions for Turfgrass:

- Irrigation or rainfall should occur within 24 hours after application to move the active ingredient through the thatch.
- Avoid mowing turf or lawn area until after adequate irrigation or rainfall has occurred.

-

Restricted Entry Interval

12 hours

Exception: If the product is applied by drenching, the Worker Protection Standard, under certain circumstances, allows workers to enter the treated area if there will be no contact with anything that has been treated.

Timings

[Prior to egg hatch of grubs, billbugs, annual bluegrass weevil, and European Crane Fly to maximize control.](#)

[For suppression of chinchbugs, make application before the hatching of the first instar nymphs.](#)

For control of mole crickets make application before or during the peak egg hatch period.
