

USE SITE: FOR TREES - SOIL DRENCH

Limitations, Restrictions, and Exceptions

Use Site: TREES, SHRUBS, FLOWERS AND GROWDCOVERS

Soil Drench

Apply in no less than 10 gallons of water per 1,000 square feet as a drench around the base of the tree, directed to the root-zone. Any plastic or other barrier that may prevent drench solution from reaching the root-zone must be removed.

Notes and Restrictions for Trees:

- Use sufficient water to be able to inject an equal amount of solution in each hole.
- Use low pressure and sufficient solution for thorough distribution into the treatment zone.
- Maintain soil moisture for 7 to 10 days.
- Do not use less than 4 holes per tree.
- No soil injection applications allowed in Nassau or Suffolk counties of New York.
- Application to trees already heavily infested with borers listed may not prevent the eventual loss of the trees.

Method

[Drench](#)

Restricted Entry Interval

12 hours

Exception: If the product is applied by drenching, the Worker Protection Standard, under certain circumstances, allows workers to enter the treated area if there will be no contact with anything that has been treated.
