

ADULT JAPANESE BEETLES, THRIPS, APHIDS, SPIDER MITES, ETC.

General Information

For Best Results: Spray at Dusk. This lengthens drying time and treatment. Thoroughly water plants in AM. At dusk spray a fine mist on stems, leaves top and bottom. Please do not over spray. Please test! Dilution may be required in 90 plus degree heat to avoid leaf burn. Applications during mid-day or high temperatures may cause leaf burn or leaf fall, neither of which should harm the plant. Please test seedlings first, dilute 50% if necessary. Pests and disease will not become resistant to this product.
