

APPLES, PEARS

General Information

GENERAL INFORMATION

Do not use when temperatures exceed 90°F or when plants are under stress conditions such as heat or water stress. When temperatures are cold allow extra time for this product to completely dissolve.

The product is compatible with most commonly used pesticides. Do not use with hydrated lime, lime sulfur, copper fungicides or other strongly alkaline materials. Do not use with the amine form of 2, 4-D or Banvel. A compatibility test is recommended before full scale mixing, if the desired combination has not been used in the past.

Limitations, Restrictions, and Exceptions

Post-Harvest Application Only Apply 3-5 lbs. in 100 gallons of water or 10-25 lbs. per acre in concentrate sprays. Do not exceed 20 lbs. of product per acre prior to October 1st.
