

# FOLIAR APPLICATION

## General Information

### PRODUCT INFORMATION

Organic BioLink Boron Fertilizer can be used to correct and prevent boron deficiencies in all plants.

Organic BioLink Boron Fertilizer is an essential plant nutrient that is involved in sugar and carbohydrates development.

Organic BioLink Boron Fertilizer is readily available to offer improved uptake by roots and foliage, providing a quick boost to plants under nutrient stress and correcting deficiencies.

### Limitations, Restrictions, and Exceptions

### FOLIAR APPLICATION

Use ½ to 2 quarts per acre. Apply to the plant foliage to the point of run-off, throughout the growing season as needed. On vegetables, field and row crops, apply when plant is 8 to 12 inches in height, continue application every 2 to 4 weeks as needed.
