

SEEDLING MEDIA, PROPAGATION MEDIA - PLANT MAINTENANCE

General Information

GENERAL INFORMATION

AquaGro 2000 L is recommended for use in all types of soilless growing media or growing media containing less than 50% mineral soils. This media surfactant may be used in the production and maintenance of ornamentals, hanging baskets, bedding plants, trees, planters and beds. It ensures easy rewetting and uniform distribution and availability of moisture in the root-zone. Used as directed, an AquaGro 2000 L treatment lasts 4 to 6 weeks and is biodegradable and non-toxic to plants and animals.

INJECTING AQUAGRO 2000 L FOR OPTIMUM BENEFITS AND CONVENIENCE: The most convenient way to obtain AquaGro 2000 L benefits is by mixing it in your fertilizer stock container and injecting it through your irrigation system. Injecting AquaGro 2000 L gives you the flexibility to choose the program that fits your management practices.

AquaGro 2000 L won't leach from your mix, but it does slowly biodegrade. Injecting AquaGro 2000 L ensures that it will be continuously present in the mix to enhance rapid and uniform wetting and drainage.

Limitations, Restrictions, and Exceptions

SEEDLING MEDIA, PROPAGATION MEDIA

Plant Maintenance: Reapply AquaGro 2000 L at 10 ppm weekly with liquid feed program, or drench with 1200 ppm solution of AquaGro 2000 L (120 mL/100 L of water) every 12 to 16 weeks and/or before shipping

Caution: Spraying open flowers at concentrations in excess of 500 ppm may harm petals, but will not affect unopened blooms.
