

# FIELD CORN AND SWEET CORN

## General Information

### I. GENERAL INFORMATION

When applied properly Avipel forms a bird repellent coating on corn seeds. Birds may sample treated seeds but they will avoid additional consumption. Thorough, uniform and consistent coverage is essential for full protection from bird depredation. Use only at the recommended labeled rate. Lower amounts may not give desired control.

RATES: Field Corn and Sweet Corn: Use at a rate of one scoop, 1.52 ounces per 20 pounds of seed (1.48 ounces a.i. per 20 pounds of seed) as a dry mixture in the planter box as a seed treatment just prior to planting.
