

PEANUT - POTATO LEAFHOPPER (POSTPLANT TREATMENT)

General Information

GENERAL INFORMATION

SMARTBOX INFORMATION

The SmartBox system should be properly calibrated by a person familiar with operation of the system to assure an accurate application rate of Lorsban 15G. Lorsban 15G must be applied with the SmartBox system. Please refer to the SmartBox operator's manual for detailed information on system operation and calibration procedures. Do not attempt to open or tamper with the SmartBox container. Do not attempt to repair the SmartBox container. If repairs are necessary, contact your local AMVAC sales representative or the manufacturer of the SmartBox system.

Refer to the label for the Application Rates/1000 Ft of Row and Equivalent/Acre at Different Row Spacings.

Limitations, Restrictions, and Exceptions

PEANUT

Postplant Preventive Treatment: Apply Lorsban 15G to peanuts at early flowering to pegging stage of growth in a 6 to 8 inch band over the row. For extended insect control and continued suppression of white mold (southern blight), a second application of Lorsban 15G may be made.

Postplant Rescue Treatment: Apply Lorsban 15G in a 10 to 18 inch band over the fruiting zone to control Lesser cornstalk borer.

Specific Use Restrictions:

- Do not apply more than 15 oz of Lorsban 15G per 1000 ft of row per crop season or apply more than 4 lb active chlorpyrifos per season.

- Do not make a second application of Lorsban 15G or other product containing chlorpyrifos within 10 days of the first application.
- Do not feed peanut forage or hay to meat or dairy animals.
- The combined total of preplant and postplant applications of Lorsban 4E and Lorsban 15G or other product containing chlorpyrifos must not exceed 4 lb of active ingredient per acre per crop season.
