

## **SMALL AREAS: TOTAL SURFACE AREA AFFECTED LESS THAN 10 SQUARE FEET**

### General Information

#### DIRECTIONS FOR USE

SaniDate 5.0 Sanitizer/Disinfectant works best when diluted with water containing minimal levels of organic or inorganic materials, and with water having a neutral pH. Thoroughly rinse out tank with water before mixing concentrate. This product will readily mix with clean, neutral water and does not require agitation.

SaniDate 5.0 Sanitizer/Disinfectant concentrate should not be combined or mixed with any other pesticide concentrates.

This product is not for use on medical device surfaces.

Before use in federally inspected meat and poultry food processing plants and dairies, food products and packaging materials must be removed from room or carefully protected. A potable water rinse is not allowed (Do not rinse) following use of the product as a sanitizer on previously cleaned hard surfaces provided that the surfaces are adequately drained before contact with food so that little or no residue remains.

#### Limitations, Restrictions, and Exceptions

#### REMEDICATION AND RESTORATION SITES

SaniDate 5.0 Sanitizer/Disinfectant is recommended for use on hard, non-porous, environmental surfaces such as walls and other hard, nonporous surfaces such as floors, walls, tables, chairs, countertops, garbage bins/cans, bathroom fixtures, sinks, bed frames, shelves, racks, carts, refrigerators (exterior), glazed tile, and use sites listed on the label made of linoleum, vinyl, glazed porcelain, plastic polyethylene, stainless steel, or glass.

#### Small Areas: Total Surface Area Affected Less Than 10 Square Feet - Cleanup Methods

- Minimum personal protective equipment to be worn during clean up includes gloves, N-95 respirator, and goggles/eye protection.

Prior to applying SaniDate 5.0 Sanitizer/Disinfectant, clean the affected area using one of the following or another preferred professional method.

Method 1: Wet vacuum(in the case of porous materials, some mold spores/fragments will remain

in the material but will not grow if the material is completely dried).

Method 2: Damp-wipe surfaces with plain water or use a wood floor cleaner; scrub as needed.

Method 3: High-efficiency particulate air (HEPA) vacuum after the material has been thoroughly dried. Dispose of the contents of the HEPA vacuum in well-sealed plastic bags.
