

## **MEDIUM AREAS: TOTAL SURFACE AREA AFFECTED BETWEEN 10 AND 100 SQUARE FEET - CLEANUP METHODS**

### General Information

#### DIRECTIONS FOR USE

SaniDate 5.0 Sanitizer/Disinfectant works best when diluted with water containing minimal levels of organic or inorganic materials, and with water having a neutral pH. Thoroughly rinse out tank with water before mixing concentrate. This product will readily mix with clean, neutral water and does not require agitation.

SaniDate 5.0 Sanitizer/Disinfectant concentrate should not be combined or mixed with any other pesticide concentrates.

This product is not for use on medical device surfaces.

Before use in federally inspected meat and poultry food processing plants and dairies, food products and packaging materials must be removed from room or carefully protected. A potable water rinse is not allowed (Do not rinse) following use of the product as a sanitizer on previously cleaned hard surfaces provided that the surfaces are adequately drained before contact with food so that little or no residue remains.

#### Limitations, Restrictions, and Exceptions

#### REMEDICATION AND RESTORATION SITES

SaniDate 5.0 Sanitizer/Disinfectant is recommended for use on hard, non-porous, environmental surfaces such as walls and other hard, nonporous surfaces such as floors, walls, tables, chairs, countertops, garbage bins/cans, bathroom fixtures, sinks, bed frames, shelves, racks, carts, refrigerators (exterior), glazed tile, and use sites listed on the label made of linoleum, vinyl, glazed porcelain, plastic polyethylene, stainless steel, or glass.

Medium Areas: Total Surface Area Affected Between 10 and 100 Square Feet - Cleanup Methods

- Limited or Full personal protective equipment is recommended during cleanup. Limited personal protective equipment includes gloves, N-95 respirator or half-face respirator with HEPA filter, disposable overalls, goggles/eye protection. Full personal protective equipment includes gloves, disposable full body clothing, headgear, foot coverings, full-face respirator with HEPA filter.

Method 1: Wet vacuum(in the case of porous materials, some mold spores/fragments will remain in the material but will not grow if the material is completely dried.

Method 2: Damp-wipe surfaces with plain water or with wood floor cleaner; scrub as needed.

Method 3: High-efficiency particulate (HEPA) vacuum after the material has been thoroughly dried. Dispose of the contents of the HEPA vacuum in well-sealed plastic bags.

Use professional judgment, consider potential for remediator exposure and size of contaminated area.
