

PIT TREATMENT

General Information

SUGGESTED USES:

Compost inoculant

Manure treatment

Cleaning up biodegradable compounds

RECOMMENDED RATES

Compost Piles: Spray within first week of starting piles. Use 55 gallons CPR per 4' high x 100' long pile.

Pit Treatment: Per 100,000-gallon manure pit, use 25 gallons CPR, 50 gallons molasses, 50# brewers yeast, and 4-5 gallons hydrogen peroxide.

Bio-Remediation: Consult your sales representative for site-specific application rates and instructions.

Other Uses: Consult your sales representative.

CPR should be stored in clean containers that are vented.

Do not mix with fertilizers until day of application.

CPR meets National Organic Program requirements for organic production.

CPR contains NO Genetically Modified Organisms.

This product is intended for use according to an approved organic system plan.
