

HIGHER USE RATES

General Information

GENERAL INFORMATION—FS Transform is a low-use-rate, ammonium sulfate replacement product that combines water conditioning agents and ammonium ions in a convenient premix formulation. FS Transform is designed to effectively replace the need for ammonium sulfate with weak acid herbicides such as glyphosate, dicamba and phenoxies by sequestering antagonistic hard water ions and providing ammonium ions to ensure enhanced uptake of certain pesticides.

FOR USE WITH PESTICIDES REGISTERED FOR AGRICULTURAL, FORESTRY, INDUSTRIAL, MUNICIPAL, NON-CROPLAND, RIGHTS-OF-WAY AND OTHER APPROPRIATE USES.

Limitations, Restrictions, and Exceptions

APPLICATION RATES - Using the guidelines below, apply FS Transform at 1-2 quarts per 100 gallons (0.25-0.5% v/v).

NOTE: Use the higher use rates:

-When replacing 17 lbs of ammonium sulfate per 100 gallons of spray solution

-When nitrogen responsive weed species, such as velvetleaf, are present or weeds are under weather stress conditions
