

APRICOTS, NECTARINES, PEACHES, PLUMS, AND PRUNES - FOLIAGE

General Information

GENERAL RECOMMENDATIONS

PESTICIDE COMPATIBILITY: This product is generally compatible with insecticides, herbicides, miticides, fungicides and foliar nutrients. It may be incorporated into existing spray programs. Add this product to water before adding pesticides. It is always advisable to first test for compatibility on a small scale before tank mixing products.

FERTILIZER COMPATIBILITY: This product is compatible with 32% and 28% Nitrogen solutions. Addition of this product to any type of fertilizer solution, especially concentrates, should not be done without first testing for compatibility on a small scale.

FOLIAR APPLICATION: For best absorption into the plant, apply this product in early morning or late evening. For aerial application use at least 1 gallon of water for every pint of this product applied to the crop. Consult your local farm advisor for information on sensitive varieties and hybrids.

Limitations, Restrictions, and Exceptions

APRICOTS, NECTARINES, PEACHES, PLUMS, AND PRUNES - FOLIAGE

Mix 2 to 3 qts. per acre with sufficient water and apply as a thorough cover spray dormant or delayed dormant with oil or pesticide. Repeat at petal fall and cover sprays at 1 to 4 qts. per acre. **CAUTION:** Do not apply more than 2 qts. per acre to plums or sensitive varieties with cover sprays.
