

VINE CROPS

General Information

GENERAL DESCRIPTION:

An especially effective, soluble supplement for foliar Ca applications to trees & vines, vegetable & field crops, turf & greenhouse plants and various ornamental species.

INTEGRITY CALCIUM-O may be used with most organic fungicides, insecticides, adjuvants or nutrients. Consult a technical representative for appropriate rates and possible compatible combinations.

CAUTION: Possible precipitation may be experienced when combined with materials containing phosphorus, when the pH of the tank water is above 6.5 or if insufficient water volumes are used. Consult a technical representative for specific procedures.

Limitations, Restrictions, and Exceptions

VINE CROPS

2-6 qts/100 gal ahead of, during and shortly following bloom as well as throughout the growing season. Especially apply ahead of or during physiologically or environmentally-induced stress periods.
