

## FRUIT AND NUT TREES - GRAPES

### General Information

TRACEMAKER LIQUID BORON is a solution of plant food boron that when used according to recommendations will help control boron deficiencies. It is specially formulated to enhance uptake and leaf absorption as well as solubility in both water and NPK fertilizer materials.

TRACEMAKER LIQUID BORON can be tank mixed with water and/or most pesticides and incorporated in NPK fertilizer materials. It can be foliar sprayed, injected through irrigation systems or applied broadcasts.

### DIRECTIONS FOR USE

FOLIAR: TRACEMAKER LIQUID BORON will disperse in water with minimal agitation. Follow the mixing sequence: 1. Water 2. Boron 3. Pesticide. Minimum GPA: 20 ground, 5 Air.

FLUID FERTILIZER MFG: TRACEMAKER LIQUID BORON does not require pre-mixing before addition to fertilizer. When mixing in a batch tank, add water or nitrogen solution before adding phosphate material. Mix thoroughly.
