

# HIGH GLOSS, QUICK-DRYING CITRUS COATING

## General Information

1. Apply Lustre Dry full strength over brushes to clean, dry fruit.
2. Use 1 gallon (3.8 liters) Lustre Dry per 8,000 - 12,000 (3600 - 5400 kg) pounds of citrus.
3. Apply using overhead spray or drip system over brushes having at least 50% horsehair to help spread the wax. Brush speed should not exceed 100 rpm.
4. Agitation is required when using a fungicide.
5. Dry with forced air and heat at 100° - 130°F (38° - 54°C) for 2-3 minutes.
