

ACID CLEANER - REMOVES HEAVY MINERAL DEPOSITS FROM APPLES

General Information

1. Prepare use-solutions by adding approximately 1 gallon (3.8 liters) Mineral-XX to 100 gallons (380 liters) water.
2. Expose fruit in treatment water for 1-2 minutes.
3. For optimum results, maintain use-solution at approximately pH 2-3.
4. To ensure dispersion of Mineral-XX in dump tank water, regularly agitate solution.
