

POST HARVEST COLORING OF CITRUS FRUIT

General Information

DIRECTIONS FOR USE

1. For initial charge, add 1 gallon (3.8 l) PacRite Color-Add to each 300 gallons (1100 l) of water in the Color-Add tank.
2. During operation, add 1 gallon (3.8 l) PacRite Color-Add for each 2500 boxes of fruit processed.
3. Actual quantity of Color-Add used can be varied as desired.
4. Do not exceed treatment time of 4 minutes at 120°F for oranges or 2.5 minutes at 115°F for temples and tangelos.
5. Rinse fruit thoroughly with water immediately after color treatment.

IMPORTANT: Do not allow water to contaminate the contents of this container.
