

PROTECTIVE COATING FOR STONE FRUIT AND VEGETABLES

General Information

DIRECTIONS FOR USE

1. For use on stone fruit and other soft fruits and vegetables.
2. Apply at full strength on clean, dry fruit at a rate of 1 gallon per 75,000 pounds of fruit.
3. For best results, apply at 100°F as a drip or spray.
4. May be applied in conjunction with approved post-harvest fungicides.
