

STONE FRUIT AND VEGETABLES

General Information

DIRECTIONS FOR USE

1. Apply PrimaFresh 60-OR directly or diluted on previously washed and dried fruit surface.
2. If diluted before application, use soft water. Dilution ratios may be adjusted to suit specific needs.
3. On nectarines, plums, peaches and other round fruits and vegetables, PrimaFresh 60-OR is applied by spraying over brushes or rollers at a rate of 1 gallon (3.8 liters) of concentrate per 20,000 - 25,000 pounds (9100 - 11,300 kg) of fruit.
