

APPLE

General Information

PrimaFresh Golden is formulated with carnauba wax to resist “whitening” caused by condensation when fruit are removed from cold storage.

DIRECTIONS FOR USE

1. Apply to clean dry fruit over brushes with at least 50% horsehair at a rate of 8,000 to 12,000 pounds (3600 – 5400 kg) of fruit per 1 gallon (3.8 liters). Fruit should be as dry as possible prior to application to enhance shine.
2. NOTE: Excess application of wax may cause drips or streaks that can stain the fruit. Do not over-apply this product to fruit.
3. Apply with a spray or drip system.
4. Dry with a conventional dryer at 90°-100°F (32°-38°C) for two minutes. This product tends to dry quickly. Do not allow the product to dry in the brush bed during application.
5. If the coating is drying too fast, turn off the heat in the dryers and use only fans.
6. When applying this product, use the least amount of antifoam needed to control foam.
7. Clean application equipment every eight hours with warm, fresh water.
8. Use a wax stripper weekly or as needed.
