

POTATOES (BAND APPLICATION - 35 DAY POSTEMERGENCE)

General Information

RECOMMENDATIONS FOR CROP USE

Apply Kelpak Liquid Seaweed Concentrate to transplant seedling tray, to transplant water, or as foliar applications to plants. Please refer to Kelpak Application Guide for specific crop recommendations. Kelpak can be applied through drip and/or micro systems, drench, furrow, or flood irrigation, or foliarly with pesticides and/or nutrients. Kelpak is applied in conjunction with standard fertilizer programs. Consult the local distributor for fertigation applications.

Limitations, Restrictions, and Exceptions

POTATOES (AT 1 QUART / ACRE)

Spray again 35 days after emergence.
