

WHEAT

General Information

1 measuring scoop, provided, treats approximately 60 lbs. wheat seed.

DIRECTIONS FOR USE: Apply as a dry seed treatment prior to planting

DRILL BOX APPLICATION: Measure appropriate amount of SabrEx and sprinkle onto seed in the planter or drill box. For best results, fill planter box with seed, then add SabrEx and mix until uniform seed coverage is obtained.

BULK APPLICATION: Apply by manually or mechanically dispersing SabrEx into a flowing stream of seed. Ensure that SabrEx is evenly dispersed in the planter or drill box.
