

AERIAL APPLICATION

General Information

Sun Control is a 97% proprietary blend of methyl seed oil, nonionic polymer, wetting and buffering agents.

Sun Control has a unique blend of alcohol ethoxylates and organosilicone surfactants for superior wetting.

Sun Control has a polymer surfactant and buffering agent to help with drift and hard minerals.

When using Sun Control, you won't have to carry as much chemical in the field because of its low rates.

Sun Control is excellent for aerial and ground applications in agriculture, aquatics and forestry.
