

FOLIAR APPLICATION

General Information

GENERAL INFORMATION

CHEM-PLEX LIQUID MANGANESE is a proprietary blend of a soluble nutrients and an organic complexing agents so as to enhance and maintain availability and accelerate uptake by crops.

CHEM-PLEX LIQUID MANGANESE is non-phytotoxic and can be applied foliar to most crops. It is recommended for use throughout the season in a program of multiple applications for greater efficiency. This provides a continuous supply of vital nutrients at or near the time they are needed most.

CHEM-PLEX LIQUID MANGANESE is environmentally safe made with only “clean raw materials free from heavy metal contamination.

DIRECTIONS FOR USE

CHEM-PLEX LIQUID MANGANESE can be added to most nitrogen solutions or fluid fertilizers and impregnated on dry blend fertilizer. It can be tank mixed with most pesticides. Always make a small-scale test to assure compatibility. It can be soil or foliar applied, broadcast or banded over the row and injected through irrigation system. CAUTION: DO NOT USE IN HIGH PHOSPHATE “STARTER” OR “POP-UP” FERTILIZER MATERIALS SUCH AS 10-34-0.

CHEM-PLEX LIQUID MANGANESE will disperse in water with minimal agitation. It serves as a buffer when used in tank mixes with pesticides. Follow the mixing sequence: 1 water; 2 CHEM-PLEX LIQUID MANGANESE; 3 Pesticides

RECOMMENDED RATES

The optimum rate and timing of application will depend on local conditions and should always be made as a result of soil and/or plant tissue analysis in consultation with your local agricultural authorities.

Limitations, Restrictions, and Exceptions

Repeat as necessary if deficiency persists. Use sufficient water for thorough

coverage. Ground: 10-20 gals per acre. Air 3-5 gals per acre. If less water is used slight burn may occur. Spray either early or late in the day for maximum leaf absorption.
