

FOLIAR SPRAY

General Information

Rate of Application (Foliar Spray Use): Use on all crops, to improve plant vigor and to promote crop production. For best results multiple applications should be used. Begin early in the growing season and make 3 to 5 applications at 7 to 14 day intervals. Apply as a foliar application to supplement the normal soil applied fertility program. Can be applied by aircraft at rates equivalent to 1 lb. in 1 gal. of water per acre. This product is compatible in the spray tank with commonly used insecticide, fungicide and miticide programs. NUEXPRESS contains Patented Express Technology, which is the sole intellectual property of Miller Chemical & Fertilizer Corporation.

Fertigation: Maybe used under normal fertigation practices.
