

SOIL APPLICATIONS

General Information

NutriSol Boron UN is a formulation for use in soil and foliar applications on crops requiring Boron. NutriSol Boron UN contains Urea based Nitrogen and can be used in liquid fertilizers, suspensions or in water and is compatible with most pesticides and fertilizers. Boron primarily regulates carbohydrate metabolism in plants. It is an essential element for protein synthesis, seed and cell wall formation, germination of pollen grains and growth of pollen tubes. Boron also aids in sugar translocation.

DIRECTION FOR USE

This product is compatible with most pesticides and fertilizers. However, a test for compatibility is recommended prior to large scale mixing. Always add NutriSol Boron UN to water prior to large scale mixing. Do not apply in aqua ammonia.

Limitations, Restrictions, and Exceptions

SOIL APPLICATIONS: NutriSol Boron UN can be soil applied but should be incorporated. Apply 2-4 quarts per acre as a sidedress or preplant application. Crops with severe deficiencies may require supplemental soil applications of NutriSol Boron UN to maintain a concentration of 1 to 5 ppm in the soil. For best results when soil applied, split applications should be utilized. Do not place in direct contact with seed or starter fertilizer. NutriSol Boron UN can be applied alone or in combination with agricultural chemicals and liquid fertilizers.
