

WOOD TREATMENT - TREATMENT OF WOOD FOAM-FOAM COMPOSITE STRUCTURAL COMPONENTS

General Information

USE INFORMATION

LUM-BOR is a water-soluble inorganic borate salt with insecticidal and fungicidal properties effective against wood-destroying organisms, including the listed target pests. This product can be used for remedial treatment of infested wood, for preventative treatment (before signs of infestations) for wood in existing structures, or for pre-treatment of wood during construction.

This product is recommended for wood and cellulose materials, in accordance with the specific treatment methods described herein. This product is effective for all interior and exterior wood (and wood-foam composite structural components) that will be protected from excessive rain not in direct contact with soil. Types of wood include, but are not limited to, all types of lumber, logs and plywood. This product is toxic to wood-destroying insects, but surface etching of treated wood by target organisms may occur.

Limitations, Restrictions, and Exceptions

WOOD TREATMENT

Treatment to Wood-Foam Composite Structural Components: Apply 10% solution on all sides to runoff.

Note: One quart or 32 ounce container loose packed is equal to 1 pound.
