

AGRICULTURAL, FORESTRY, TURF AND ORNAMENTAL, INDUSTRIAL, STRUCTURAL AND NON-CROPLAND SITES

General Information

DIRECTIONS FOR USE

NO FOAM B is designed to increase the efficiency of acaricides, defoliants, desiccants, fungicides, herbicides and insecticides, especially organophosphate pesticides. It assures quick wetting and uniform coverage of spray applications. NO FOAM B may be used on agricultural, forestry, turf and ornamental, industrial, structural and non-cropland sites. It should also be used to buffer highly alkaline water.

NO FOAM B is formulated from materials which do not tend to burn foliage or leave harmful residues. There will be no excessive foaming when high pressures are used.

Read and follow the precautions, restrictions and recommendations on the labels of pesticides used with NO FOAM B. Use according to the most restrictive label directions for each product in any tank mix.

**NOTE: COMBINED ANIONIC-NONIONIC SURFACTANT BLEND FOR TERRESTRIAL /
AQUATIC USE SITES**

Limitations, Restrictions, and Exceptions

RECOMMENDATIONS: Proper quantity to use will vary with the type of equipment, water volume per acre, temperature, type of foliage to be wet, and the pesticide formulation. Also, higher rates than those below may be used if recommended by pesticide labeling. Follow pesticide label directions. However, do not add this product at a rate which exceeds 5% of the finished spray volume.

AIR or GROUND: Use $\frac{1}{2}$ -3 pints per 100 gallons of finished spray solution. For improved efficacy, use at least $\frac{1}{2}$ pint per acre when finished spray volume is less than 20 gallons per acre. For backpack or hand held sprayers, use 1 fl. oz. per gallon of finished spray solution.
