

HARD TO WET SOILS

General Information

- Increases water penetration through compacted soils.
- Improves wetting of hydrophobic soils and potting mixes
- Reduces irrigation water run-off.
- Gives greater water efficiency.
- Helps eliminate dry spots and wet spots in fields and turf.
- Reduces stress between irrigations.
- Non-toxic, nonflammable and completely biodegradable.

Limitations, Restrictions, and Exceptions

HARD TO WET SOILS: Apply 1-2 pts./acre with each irrigation.

Drip or Sprinkler: Inject directly into the system during the first 25-50% of the irrigation(s).

Flood or Border: Meter or drip into the irrigation water at a point of turbulence. Apply continuously during 100% of the water run.
