

WITH ROUNDUP: MINIMUM/ZERO-TILLAGE/SUMMERFALLOW

General Information

GENERAL INFORMATION:

Ag-Surf ORIGINAL is a surfactant for use with Roundup, Ally and Reglone herbicides, and Rovral 50% W.P. fungicide, in situations where a non-ionic surfactant is called for (minimum or zero tillage systems surfactant additive, etc.). It is important to follow label directions for Roundup, Ally, and Reglone herbicides and Rovral fungicide, using the recommended rates in combination with Ag-Surf ORIGINAL

Limitations, Restrictions, and Exceptions

With Roundup: Minimum/Zero-Tillage/Summerfallow: To improve the effectiveness for post-emergent control of annual grasses and broadleaf weeds in Minimum/Zero-Till systems for wheat, oats, barley or on summerfallow, apply Ag-Surf at 350 mL/ha plus Roundup at 1.1 L/ha in 50 - 100 L/ha of clean water. See Minimum and Zero Tillage section of Roundup label for weeds controlled and other details of application.
