

WITH ROVRAL 50% W.P.

General Information

GENERAL INFORMATION:

Ag-Surf ORIGINAL is a surfactant for use with Roundup, Ally and Reglone herbicides, and Rovral 50% W.P. fungicide, in situations where a non-ionic surfactant is called for (minimum or zero tillage systems surfactant additive, etc.). It is important to follow label directions for Roundup, Ally, and Reglone herbicides and Rovral fungicide, using the recommended rates in combination with Ag-Surf ORIGINAL

Limitations, Restrictions, and Exceptions

With Rovral 50% W.P.: For use in rapeseed only. For the control of Sclerotinia Stem Rot add Ag-Surf at the rate of 0.5% of the final spray solution (500 mL in 100 litres).
