

LAWNS AND TURF

General Information

GENERAL INFORMATION

SIL-SURF is a unique nonionic organosilicone wetting agent, that is highly effective with postemergent and non-selective herbicides, SIL-SURF's organosilicone chemistry, allows for enhanced wetting and absorption of herbicides into plant, leaf, and stem surfaces. SIL-SURF may be used with most pesticides and fertilizer products as directed on the label. Observe initial application to insure thorough coverage without excessive runoff of the spray.

(Refer to the label for mixing instruction)

Limitations, Restrictions, and Exceptions

LAWNS AND TURF

For increased water penetration of hard to wet soils and the uniform distribution of applied moisture, follow recommended uses:

Lawns and Turf: .05% - .125% v/v concentration.

Greens and Tees: .05% - .125% v/v concentration.
