

## **VEGETABLE CROPS**

### General Information

### General Information

Core Zinc Nitrate is a readily available form of zinc, specifically formulated for use to treat zinc deficiencies and disorders in vegetable crops, field crops, trees, vines, turf and ornamentals. CORE Zinc Nitrate used as a foliar spray along with a sound fertility program, assures that the nutritional demands of the plant are satisfied. Avoid application under extreme climatic conditions.

CORE Zinc Nitrate can be used on any agricultural crop where a zinc deficiency exists or where added zinc would be beneficial. Compatibility: CORE Zinc Nitrate is formulated to mix with most commonly used insecticides and fungicides. This product can also be applied via irrigation. However, a jar test for compatibility should be performed prior to application. This product is not recommended for use with copper or tin fungicides.
