

SOIL APPLICATION

General Information

TECH-SPRAY Mo-POWER supplies the guaranteed nutrients in a water soluble form to use as a nutritional spray. It is designed to be combined with TECH-FLO products but also may be applied alone.

NOTE: For all crops DO NOT APPLY more than a total of 2 gallons of TECH-SPRAY Mo-POWER per acre per year.

GENERAL RECOMMENDATIONS

DILUTION: Apply the suggested rates of TECH-SPRAY in the following amounts of water per acre. Minimum dilution rate: 1 qt. per 5 gallons water suggested rate.

Field & Row Crops:

By Air - 3-20 gals

By Ground - 10 gals minimum

Tree Crops:

By Air - 10 gals minimum

By Ground concentrate - 40-100 gals.

By Ground dilute - 100-500 gals.

Limitations, Restrictions, and Exceptions

SOIL APPLICATION

For best results, apply to root zone during or preceding irrigation.
