

BEANS, CUCUMBERS, LENTILS, MELONS, ETC.

General Information

General Information

THRIVE GENERAL PURPOSE 20-20-20 is a balanced formulation for use to achieve all-around health in turf, ornamentals, shrubs, trees, vegetables, and field crops. THRIVE GENERAL PURPOSE 20-20-20 is formulated using the highest quality materials for optimum solubility and maximum performance.

General Applications

THRIVE GENERAL PURPOSE 20-20-20 may be applied at a rate of 5 to 10 lbs (2.27 to 4.54 kg) per acre as a foliar application as a supplement to normal soil applied fertility program. It may be applied by aircraft at rates as low as 5 lbs (2.27 kg) per 2 gal (3.8 liters) of water per acre. For backpack sprayers, use at a rate of 4 tsp (19.7 ml) per gal (3.8 liters) of water per acre.

Limitations, Restrictions, and Exceptions

Apply at a rate of 5 to 10 lbs per acre, with first application when plants are 3 to 4 weeks old. Apply at 7 to 10 day intervals or as needed, depending on weather conditions and amount of growth desired. Up to 6 applications may be needed for best results.
