

TRANSPLANTING

General Information

General Information

THRIVE GENERAL PURPOSE 20-20-20 is a balanced formulation for use to achieve all-around health in turf, ornamentals, shrubs, trees, vegetables, and field crops. THRIVE GENERAL PURPOSE 20-20-20 is formulated using the highest quality materials for optimum solubility and maximum performance.

General Applications

THRIVE GENERAL PURPOSE 20-20-20 may be applied at a rate of 5 to 10 lbs (2.27 to 4.54 kg) per acre as a foliar application as a supplement to normal soil applied fertility program. It may be applied by aircraft at rates as low as 5 lbs (2.27 kg) per 2 gal (3.8 liters) of water per acre. For backpack sprayers, use at a rate of 4 tsp (19.7 ml) per gal (3.8 liters) of water per acre.

Limitations, Restrictions, and Exceptions

Dissolve 2 lbs per 100 gal of water using 1 cup (8 oz) of solution per plant for hand setting. To prepare a slurry, add 1/4 lb to a 3 gal bucket of puddled soil
Transplanting requires about 200 to 300 gal of water per acre, or 10 to 15 lbs of THRIVE GENERAL PURPOSE 20-20-20 per acre.
