

TURF

General Information

DIRECTIONS FOR USE:

PLANTEX 10-52-10 is recommended for use on all plants depending on the water quality. This fertilizer contains a higher level of available phosphate. For tender plants and greenhouse spray applications use one half the recommended rate of application. PLANTEX is soluble at the rate of 2½ - 4 lbs per gallon of water. Use warm water for fastest dissolving. Store in a cool, dry place.

For transplanting plants, in the field or greenhouse: Dissolve 5 lbs of PLANTEX 10-52-10 in 100 gallons of water. Apply ½ pint of this solution per plant.
